FOOD TRUCK STORE · AIR 220 TRAILER WRAP

The formats of your five panels.

For your designer. Valid for every AIR 220 trailer: Chef+, Essentiel, Frost and Barista. One file per panel; the 1:10 templates follow on pages 2 to 6.

	Panel	Panel size	File to supply	Shape and cut-outs	
	**Plain side** Side without the hatch, from the bottom of the body to the middle of the roof	**194 × 260** cm	**204 × 270** cm	Wheel cut out. Above 111 cm, the design runs over the roof curve and is mostly seen from a distance.	p. 2
	**Lower serving side** Below the hatch, from the bottom of the body to the hatch	**194 × 82** cm	**204 × 92** cm	Wheel cut out. With the counter down, the top 16 cm stay visible: key information goes there.	p. 3
	**Serving hatch** The closed hatch, seen from outside	**184 × 110** cm	**194 × 120** cm	Curved, it follows the roofline and lifts up when opened.	p. 4
	**Rear** Door end, door included	**170 × 191** cm	**180 × 201** cm	Straight for 106 cm, then rounded (85 cm radius). Door cut at the seal, lock and hinges cut out.	p. 5
	**Front** Drawbar end, window flap included	**170 × 191** cm	**180 × 201** cm	Straight for 106 cm, then rounded (85 cm radius). Serving window, sockets, lights and recess cut out.	p. 6

5 cm bleed

The file is 5 cm larger than the panel on each side (up to 10 cm if your installer asks): the installer trims off the excess when fitting.

5 cm safe area

Keep text, logos and phone numbers at least 5 cm from the edges of the panel.

1:10 scale or full size

At 1:10 scale, 1 mm = 1 cm on the trailer: the plain side file is then 204 × 270 mm, like the templates.

Vector PDF preferred

Text converted to outlines. Photos: at least 72 dpi at full size (720 dpi at 1:10 scale).

CMYK colours

Ask your printer or installer for the colour profile before exporting.

See it in 3D

Upload each file onto the trailer: foodtruckstore.fr/en, your trailer's page, "Try it on my trailer".

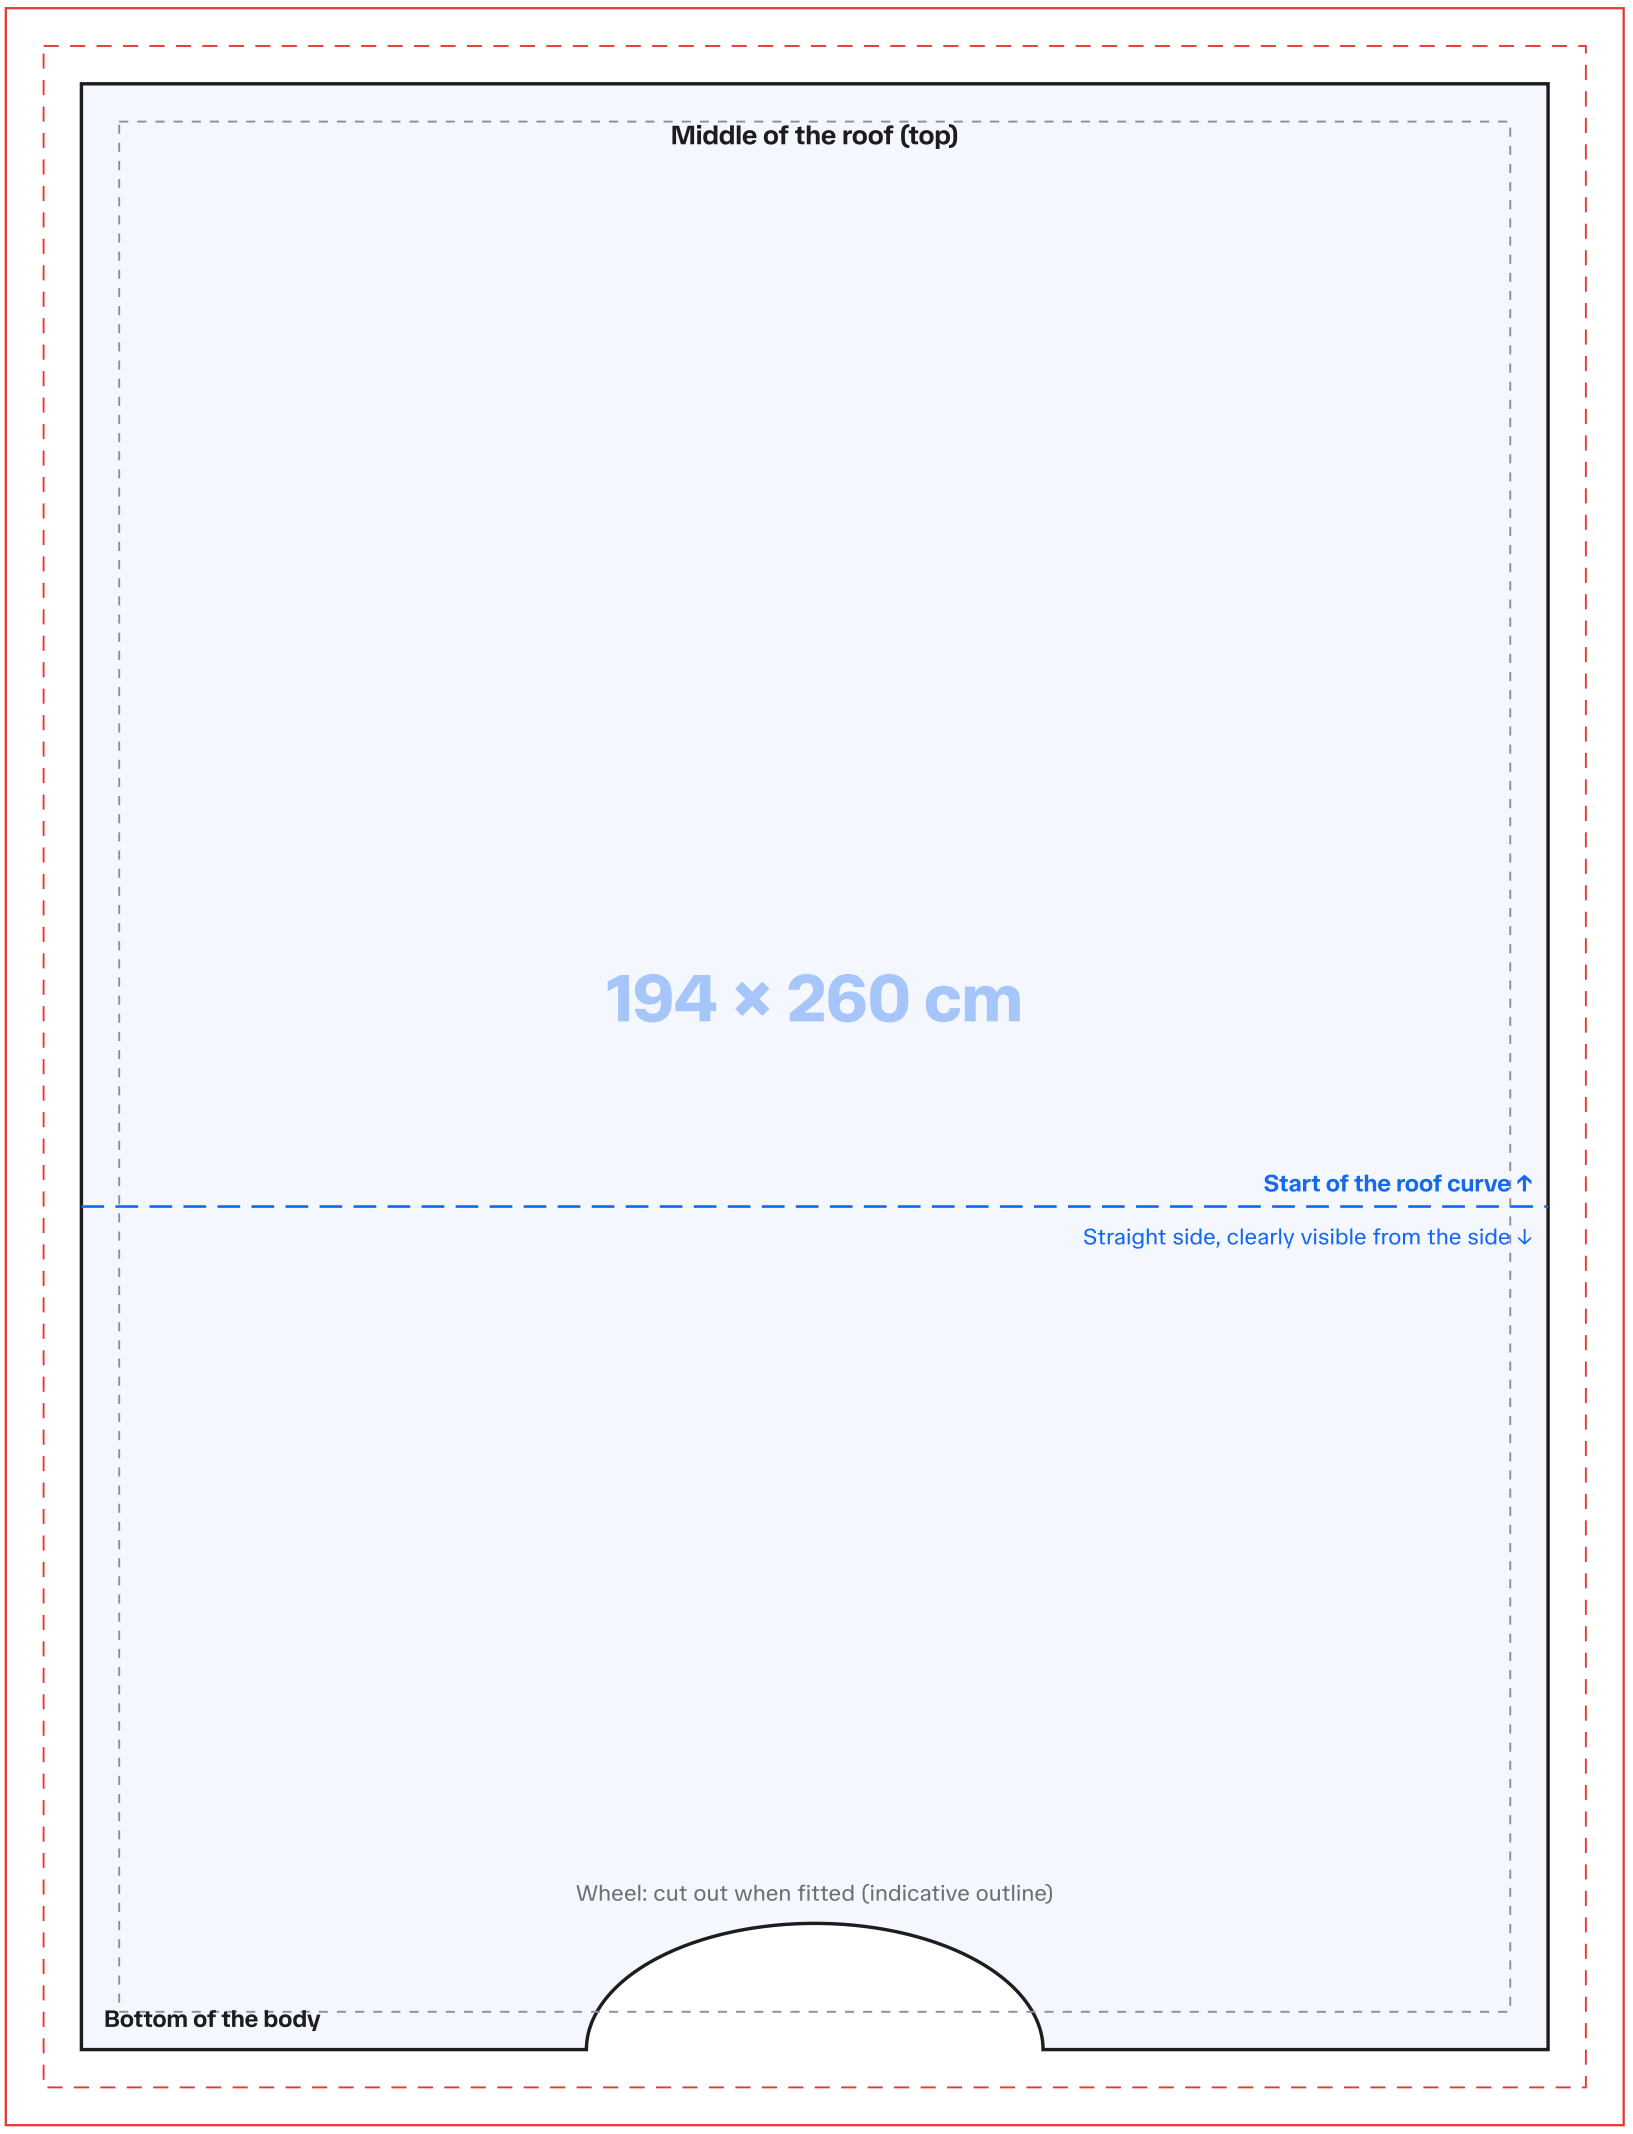

These templates don't replace a wrap installer's expertise: they take the final measurements on your trailer, then print and fit your wrap.

Dimensions measured on the trailer by Food Truck Store on 29/09/2026, from the bottom of the body, for guidance only. Food Truck Store does not print or fit wraps.

Wrap template · Plain side · AIR 220 trailer

Scale 1:10: 1 mm on this template = 1 cm on the trailer · actual panel 194 × 260 cm · Food Truck Store

Seen from outside, on the side without the hatch: the rear (door) on the left, the drawbar on the right.

Red: 5 to 10 cm of bleed all round: the design runs out to here and the installer trims off the excess.

Grey: safe area, keep text and logos inside it (5 cm from the edges).

Blue: above this line, the design runs over the roof curve and is mostly seen from a distance.

Recommended file: PDF at 1:10 scale (this template) or full size, bleed included, text converted to outlines.

Upload it in the 3D view on the Food Truck Store website to see it on the trailer.

Wrap template · Lower serving side · AIR 220 trailer

Scale 1:10: 1 mm on this template = 1 cm on the trailer · actual panel 194 × 82 cm · Food Truck Store

Seen from outside, on the serving side: the drawbar on the left, the rear (door) on the right.

Red: 5 to 10 cm of bleed all round: the design runs out to here and the installer trims off the excess.

Grey: safe area, keep text and logos inside it (5 cm from the edges).

With the counter folded down, the top 16 cm stay clearly visible: put the key information there.

Recommended file: PDF at 1:10 scale (this template) or full size, bleed included, text converted to outlines.

Wrap template · Serving hatch · AIR 220 trailer

Scale 1:10: 1 mm on this template = 1 cm on the trailer · actual panel 184 × 110 cm · Food Truck Store

Seen from outside, hatch closed: the drawbar on the left, the rear (door) on the right.

Red: 5 to 10 cm of bleed all round: the design runs out to here and the installer trims off the excess.

Grey: safe area, keep text and logos inside it (5 cm from the edges).

The hatch is curved (it follows the roofline) and lifts up: when open, it can be seen from a distance, above the trailer.

Recommended file: PDF at 1:10 scale (this template) or full size, bleed included, text converted to outlines.

Wrap template · Rear · AIR 220 trailer

Scale 1:10: 1 mm on this template = 1 cm on the trailer · actual panel 170 × 191 cm · Food Truck Store

Seen from behind: the serving side on the left, the plain side on the right.

Red: 5 to 10 cm of bleed all round: the design runs out to here and the installer trims off the excess.

Grey: safe area, keep text and logos inside it (5 cm from the edges).

The wrap continues onto the door and is cut at the seal; lock and hinges are cut out.

Recommended file: PDF at 1:10 scale (this template) or full size, bleed included, text converted to outlines.

Wrap template · Front · AIR 220 trailer

Scale 1:10: 1 mm on this template = 1 cm on the trailer · actual panel 170 × 191 cm · Food Truck Store

Seen from the front: the plain side on the left, the serving side on the right.

Red: 5 to 10 cm of bleed all round: the design runs out to here and the installer trims off the excess.

Grey: safe area, keep text and logos inside it (5 cm from the edges).

The wrap continues onto the window flap and is cut at the seal; sockets, lights and recess are cut out.

Recommended file: PDF at 1:10 scale (this template) or full size, bleed included, text converted to outlines.
